

UK Renewable Energy Generation - Monthly Data

January 2002 to December 2002

By Site

Data used in this compilation was obtained from the list of Renewable Obligation Certificates purged from the Renewables and CHP Register available through the Ofgem web site. The most recent date of Renewable Obligation Certificate (ROC) issue included in the analysis was 12th August 2004. The analysis does not include ROCs revoked, cancelled, or deleted.

The installed capacity of each site, was obtained from the Accreditation List published by Ofgem on 4th November 2005, although where information is incomplete later lists were used.

Notes:

1. The total number of certificates identified in this report have been reconciled with the raw data downloaded from Ofgem.
2. The accuracy of the percentage values depends on the accuracy of the data downloaded. Any error in the number of certificates issued or the installed capacity will give incorrect percentage values.
3. The actual output is the cumulative total of ROC's issued in the year. The maximum possible output is the cumulative number of ROC's which could be issued if the output was continually at the maximum installed capacity value, without interruption, for the same time period. The percentage gives the ratio of the actual output compared to the maximum possible output.

21st April 2009

Most recent ROC issue date

12th August 2004

Monthly output by location

January 2002 to June 2002

Data Collected from Ofgem

21st April 2009
