

UK Wind Energy Generation

2002 to 2007

By Site

Annual Energy Production and Load Factor

The most recent date of ROC issue on the Renewable Obligation Certificate Register available from the Ofgem web site included in the analysis was **14th March 2008**.

The two figures shown for MWh are the actual number of ROC's issued and the maximum possible number of ROC's which could be issued if the output was continually at the maximum installed capacity value, without interruption, for the same time period.

The data depends on the accuracy of both the number of ROCs credited to and the installed capacity of each energy production facility, both obtained from the Ofgem web site. Errors in the data obtained from the web site will be reflected in the information contained in this document.

Monthly data may be obtained from the "UK Renewable Energy Generation" by year.

17th March 2008

		Installed Capacity MW	Actual MWh	Possible MWh	Load Factor %	Value of ROC Premium (£45 per MWh)

Changes Noted to Installed Capacity

The data depends on the accuracy of both the number of ROCs credited to and the installed capacity of each energy production facility, both obtained from the Ofgem web site. Errors in the data obtained from the web site will be reflected in the information contained in this document.

Current Ofgem practice is to issue a list of accredited generating stations on a monthly basis. The installed capacity of each generating station given in the list is recognised by Ofgem only for the period for which the list is valid. Changes to installed capacity, addition or removal of generating stations are not noted and may only be identified by comparing successive lists.

The accreditation data is also published ahead of the ROC's being allocated to a generating station on the ROC Register. In a small number of instances it is not possible to identify the installed capacity of the generating station corresponding to the month when the energy (and therefore the ROCs) were generated. This in turn means the calculation of the load factor relies on the most recent accreditation list and might not historically reflect the true situation at the time of generation.

Further doubt is cast when more ROCs are allocated to a generating station in a month than is possible given the installed capacity, leading to a load factor greater than 100%. In cases such as High Volts Windfarm and High Volts Windfarm NFFO, Hare Hill Windfarm and Hare Hill Windfarm NFFO, Holmside Windfarm and Holmside Windfarm NFFO the installed capacity has changed on a number of occasions. At each site the turbines are adjacent but there are significant discrepancies in the respective load factors. Ofgem refer all queries on the accuracy of such data to the site owner. The updated Ofgem reporting system does not retain earlier data but updates the installed capacity for all months for which certificates are issued, overwriting earlier values.

Ofgem should be encouraged to issue an accreditation number based on the location and plant configuration rather than on the location alone, stating clearly the date on which any change to the accreditation list becomes effective

The following lists the changes noted to the installed capacity of windfarms.

17th March 2008

Month of Change	Generating Station Name	New Installed Capacity MW	Previous Installed Capacity MW
November 2005	R00001RQWA Hafoty Ucha	1.450	0.600
November 2006	R00004NQNI Tappaghan Windfarm Ltd - A	19.500	0.225
May 2006	R00006SQSC SRO - Thorfinn Wind Energy Project	2.300	2.700
February 2006	R00022SQSC Moya (Findhorn Wind Park)	0.750	0.075
January 2007	R00043RQEN Caton Moor Wind Farm	16.000	3.000
November 2006	R00048SQSC Bu Farm	2.325	2.326
October 2007	R00054SQSC Mackies Hill of Easterton Wind Turbine	2.550	0.850
October 2006	R00060SQSC Black Law Windfarm - A,C	124.200	96.600
November 2006	R00125RQWA Moel Maelogen	2.338	2.600
October 2007	R00132RQEN High Volts Wind Farm	2.325	5.500
November 2007	R00132RQEN High Volts Wind Farm	5.500	2.325
November 2005	R00133RQEN High Volts Wind Farm NFFO	0.995	2.325
October 2006	R00133RQEN High Volts Wind Farm NFFO	2.325	0.995
October 2007	R00133RQEN High Volts Wind Farm NFFO	1.156	2.325
November 2007	R00133RQEN High Volts Wind Farm NFFO	2.325	1.156
February 2008	R00133RQEN High Volts Wind Farm NFFO	1.156	2.325
November 2005	R00140RQEN Hare Hill Wind Farm NFFO	0.995	0.619
October 2007	R00140RQEN Hare Hill Wind Farm NFFO	1.346	0.995
November 2005	R00142RQEN Holmside Wind Farm NFFO	0.995	2.325
October 2006	R00142RQEN Holmside Wind Farm NFFO	2.325	0.995
February 2008	R00142RQEN Holmside Wind Farm NFFO	1.119	2.325
March 2006	R00153RQWA Tir Mostyn & Foel Goch	21.500	21.250

Month of Change	Generating Station Name	New Installed Capacity MW	Previous Installed Capacity MW
November 2006	R00161RQEN The Greenhouse	0.097	0.225
November 2007	R00163RQEN Burton Wold Windfarm	20.000	20.500

Annual Data

The actual output is the cumulative total of ROC's issued in the year and the maximum possible output is the cumulative total number of ROC's which could be issued if the output was continually at the maximum installed capacity value, without interruption, for the same time period.

If the maximum possible output was taken over a 365 day period a lower percentage figure would be obtained where data is not available for the complete 12 months.

Most recent ROC issue date

14 March 2008
